

Study «Biodiversity at my backyard or park»

School

Step 1

Measure the area 1 x 1 meter of your chosen area!

Step 2

Shoot the selected and marked area!

Step 3

Research what plant and insect species are found in the square meter of your choice.

Step 4

- Create a poster of discovered plants and insects in your chosen area.
- Poster can be made digitally or on paper.
- The poster is visual report of your research- “Biodiversity at my backyard”.

Step 5

Garden butterfly survey

**Record butterflies that visits
your garden over the summer
and create a seperate poster for
GARDEN BUTTERFLY SURVEY!**

Step 6

Upload digitally created poster to MS teams BMM by 15th September.

If your poster is created as a real poster, take it to Latvia meeting or take a quality photo and upload to MS Teams.
